Description

Currently versions are shared with subprojects/project tree etc. but what we really need is possibility to share particular wersion with particular subproject.
Kind regards

I am also interested by this.
To have the possibility to share a version with project A and project B who are not in the same project tree.
Do you think it is possible to do it?

+1!

I think that feature would be nice! I would like to be able to choose which projects are sharing a version, disregarding their relationship.
