

Redmine - Feature #5250

Custom Fields may allow full text transformation

Description	
It would be interesting to allow administrators to define custom fields that transform the input in a link. That would be quite useful to link to another external resource.

Here is a way to turn **all** custom fields into textiled fields:

[source:trunk/app/helpers/issues_helper.rb#L82], change `simple_format_without_paragraph` into `textilizable`.

This displays all custom fields as wiki fields.

Making it optional is probably more complex... But having it for all should be all right, at least as a start, no?

#2 - 2010-04-26 11:33 - Jean-Baptiste Henry

Hi, i have the same demand.

But in the 0.9.3 version, the source of `issues_helper.rb` is not the same at all.

I can't find `simple_format_without_paragraph`.

I've search in all helpers files:

```
Search "simple_format_without_paragraph" (2 hits in 2 files)
\apps\redmine\app\helpers\wiki_helper.rb (1 hits)
  Line 54: simple_format_without_paragraph(words.join(' '))
\apps\redmine\app\helpers\application_helper.rb (1 hits)
  Line 475: def simple_format_without_paragraph(text)
```

I've been working on a few ideas to do this. I'm hoping to get it to a point where plugins can add their own.

Here's a prototype plugin where I'm working on for this exact problem: http://github.com/edavis10/redmine_url_custom_field

#4 - 2010-04-28 08:51 - Jean-Baptiste Henry

I'm glad you've found another way to do this.

I am impatient to see the result.
