

Redmine - Defect #5280

Issue lock_version not working

2010-04-09 12:41 - Tim Coleman

Target version:	Affected version:
Resolution: Fixed	

Description

I'm finding that on trunk the lock_version of the Issue model isn't being taken into account, meaning that different users can make conflicting changes to issues without any notice from redmine.

I've only had a cursory look at the source, but it looks like lock_version should perhaps be a safe attribute (see r3308), otherwise it never gets set from the request params.

Additionally (perhaps this should be a different bug?) once the lock_version is accepted as a safe attribute, the stale object exception handler in IssuesContoller::update attempts to read a non-existant variable 'attachments'. It looks like that variable was refactored away to the Issue model in r3545

Associated revisions

Revision 3663 - 2010-04-11 18:27 - Jean-Philippe Lang

Fixed: issue optimistic locking broken by r3308 (#5280).

History

#1 - 2010-04-11 19:04 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Fixed

All is fixed in r3663. Thanks for pointing it out.

#2 - 2010-04-14 16:51 - Tim Coleman

Great :) Thanks for being so quick
