Redmine - Feature #5294

Add a "last comment by" column to the issues list

2010-04-12 11:00 - Theo Bean

Description

Quite often, new tickets do not include enough information or the steps to reproduce a problem, so we ask the author to describe the issue more detailed. In the issues list, there is no way to see which of those tickets are still pending and which have been answered. Of course, I can order them by the "updated" column, but then I still don't know if the original author has provided the missing information or if another developer has just corrected the category or priority.

It would be very helpful to have a "last update by" or "last comment by" column in the issues list, so you can see who updated an issue.

Just workaround.
1. Goto Activity tab
2. Check only issue then press apply.

you will see history of issues list.
DEMO: http://www.redmine.org/projects/redmine/activity?show_issues=1

Hope this help.

#2 - 2014-06-24 18:00 - @ go2null

Workaround:

1. create a custom field.
2. http://www.redmine.org/plugins/custom-workflows
3. have fun

+1 for "Changed by" column in issues list to be included in core functionality

#4 - 2016-07-29 14:27 - Miodrag Milic

+1

None of the workarounds are practical and this is very useful info.
