Description

The attached image displays my real task report, groupped by users (solvers). I also defined many other task reports, groupped by various other criteria (e.g. category).

In all those groupped task reports, in the red rectangle (image), I would really appreciate to have the task totals:

1. The total number of tasks in each group.
2. The number of solved tasks in each group.
3. The total number of hours estimated for each group.
4. The number of hours completed for each group.

1. The total number of tasks in each group.

It's already displayed next to each group.

And how about the others?

Any progress about this?
