

Redmine - Defect #5317

projects.atom with required authentication

2010-04-14 17:57 - Harald Klimach

Status:	Closed	Start date:	2010-04-14
Priority:	Normal	Due date:	
Assignee:	Eric Davis	% Done:	100%
Category:	Feeds	Estimated time:	0.00 hour
Target version:	0.9.5	Affected version:	0.9.3
Resolution:	Fixed		
Description <p>We are running a redmine deployment with required authentication. Most RSS feeds seem to work in this setup, but the link to the feed from the projects page ends up at the login page, when not requested from the browser with a valid session.</p> <p>Used software: mysql Ver 14.14 Distrib 5.1.37, for debian-linux-gnu (x86_64) ruby 1.8.7 rails 2.3.5</p> <p>The message in the logs boils down to:</p> <pre>Filter chain halted as [:check_if_login_required] rendered_or_redirected.</pre> <p>I searched for this issue, but did only find #2078, which in fact would be also nice to have.</p>

History

#1 - 2010-05-01 19:55 - Harald Klimach

Hi there,
just wanted to report, that this issue still persists after the upgrade to 0.9.4.

#2 - 2010-06-07 15:10 - Moritz Spindelhirn

Yep,
I confirm that it is still present in 0.9.4.

#3 - 2010-06-07 16:57 - Felix Schäfer

Could you tell us more about your setups, especially the source of your redmine (i.e. downloaded from redmine.org or installed from a debian package)?

#4 - 2010-06-07 17:19 - Moritz Spindelhirn

I'm sorry but I cannot give you this information because my hoster installed it.

I see what I can do to get it ;)

#5 - 2010-06-07 17:22 - Felix Schäfer

Moritz: I have a somewhat sure way to find it out if you have access to the redmine files on your server. Have a look at `redmine_dir/config/initializers/40_email.rb`, if it looks for the file `email.yml` in `redmine_dir/config/email.yml` it's stock, if it looks in `/etc/redmine` it's the deb.

#6 - 2010-06-08 09:09 - Moritz Spindelhirn

Ok, thanks.

It looks for `config/email.yml`, so it isn't the db package.

#7 - 2010-06-08 10:17 - Felix Schäfer

Just confirmed that on [r3764](#).

#8 - 2010-06-08 10:26 - Felix Schäfer

- Assignee set to *Eric Davis*

- Target version set to *0.9.5*

Add `:index` to [source:trunk/app/controllers/projects_controller.rb#L30](#), i.e. change:

```
accept_key_auth :activity
```

to:

```
accept_key_auth :activity, :index
```

[Eric Hulser](#): Could you push that to trunk?

#9 - 2010-06-08 10:31 - Felix Schäfer

Felix Schäfer wrote:

[Eric Hulser](#): Could you push that to trunk?

And while we're at it, I think it wouldn't hurt having the ATOM link for the project index in the header, i.e. add the following to [source:trunk/app/views/projects/index.rhtml](#) :

```
<% content_for :header_tags do %>
<%= auto_discovery_link_tag(:atom, {:action => 'index', :format => 'atom', :key => User.current.rss_key}) %>
<% end %>
```

Thanks :-)

#10 - 2010-06-14 13:14 - Harald Klimach

Hi,

sorry for the somewhat late reply, and thanks for looking at this issue.

I'm following the SVN repository, but only update to tagged releases, so no debian specific stuff is involved.

I applied the both modifications (to 0.9.4), and the problem is gone.

Thanks a lot!

#11 - 2010-06-19 18:35 - Greg Mefford

- File `issue5317_svn_3774.diff` added

- % Done changed from 0 to 80

To reproduce from a clean install of trunk:

1. Administration -> Settings -> Authentication -> Check "Authentication Required." -> Click "Save"
2. Create a test project
3. Go to list of projects
 - There should be no "Atom" icon in the browser address bar
4. Click the "Atom" link at the bottom of the projects page
 - Should see the Atom feed
5. Copy the URL from the address bar
6. Click "Log Out"
7. Paste the URL back in the address bar
 - Should see the login page

After applying the patch:

- 1. Log in and get the link to the Atom feed from the projects list
 - Should see the RSS/Atom auto-discovery icon in the address bar (although it looks like Chrome doesn't work)
- 2. Log back out
 - Should see the Atom feed now

#12 - 2010-06-19 19:07 - Greg Mefford

- File 5317_permissions.diff added
- File 5317_auto_discovery.diff added

Split up the authentication fix from the auto_discovery fix.

#13 - 2010-06-19 19:37 - Eric Davis

- Status changed from New to Resolved
- % Done changed from 80 to 100
- Resolution set to Fixed

Committed both the auto discovery link and key authentication in [r3776](#) and [r3777](#). Thank you.

#14 - 2010-06-19 20:39 - Eric Davis

- Status changed from Resolved to Closed

Merged into 0.9-stable.
