<b>Target version:</b>	
<b>Resolution:</b> Duplicate	
<b>Description</b>	
<p>Right now, all email coming from redmine appears to come from the Emission mail address which is good, but not complete. A good thing would be to change the "From" to include details about "who" made the change. So instead of just having:</p> <p>From: <a href="mailto:redmine@redmine.example.com">redmine@redmine.example.com</a></p> <p>we could have:</p> <p>From: User Joe &lt;<a href="mailto:redmine@redmine.example.com">redmine@redmine.example.com</a>&gt;</p> <p>... so that at a quick glance in our email clients, we would see who did the change in RT.</p>
