Target version:				
Resolution:				

Description

[RedmineReminderEmails](#) will just send out notices to everyone. I would suggest making this a personal setting on *My account* page (like other notifications), allowing to set up the following:

- send/don't send ticket reminders (checkbox);
- frequency (daily/weekly/custom); can be done like in Hudson - a pure text input allowing cron syntax, defaulting to "0 8 * * *" (daily at 8am);
- period before the Due/Start date to send out reminders - just like the *days* switch;
- tickets to process(two multiselect listboxes - Trackers and Statuses).
- use only Due or only Start date, or both (checkboxes).

Do we have anything cron-like internally?
