

## Redmine - Defect #5526

### Using Images from the Files Section on a Wiki Page throws Error

2010-05-14 11:34 - Dominique Lederer

<b>Status:</b>	Closed	<b>Start date:</b>	2010-05-14
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Wiki	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	0.9.3
<b>Resolution:</b>	Cant reproduce		
<b>Description</b> <p>On i Wiki Page, i embedded Images uploaded via the Redmine Files section. But sometimes, these Images throw a 500 Server Error (but i see no entries in my Apache log). (I already tried to remove the /download/ part from the Attachment urls when embedding to the wiki, but that does not help).</p> <p>If i attach the Images not to the Files Section, but to a random Wiki Page as Attachment, and refer them, there is no problem at all.</p> <p>I am using the Debian lenny-backport version of Redmine.</p> <p>Database version: sqlite3.6.21 Ruby version: 1.8.7 Rails version: 2.2.3 Redmine version: 0.9.3</p>			

#### History

##### #1 - 2010-05-22 10:39 - Jean-Philippe Lang

If you have a 500 error, I need your error stack trace.

##### #2 - 2011-11-05 04:28 - Mischa The Evil

- Status changed from New to Closed

- Resolution set to Cant reproduce

- Not reproducible (any longer) on the current trunk using image tags like `!attachments/download/<id>/<name>!`.
- No more available information.
- No feedback for more than over a year after specific request for more info.

Conclusion: closing as "cant reproduce".
