<b>Resolution:</b>	Invalid		
<b>Description</b>			
When I try the REST interface from a shell, i got no result for curl "http://admin:1234@localhost:3000/issues.xml" although there are issues. The same is with curl "http://admin:1234@localhost:3000/projects.xml". With curl "http://admin:1234@localhost:3000/news.xml" it works fine, and i get a xml string.			

### History

#### #1 - 2010-05-21 10:27 - Ngewi Fet

As far as i know, this is something which is planned for version 1.0. See issue [#1214](#).  
The changelog of version 0.9.0 says REST APIs for (almost) everything. So I guess issues REST APIs are not done yet.

#### #2 - 2010-05-22 10:33 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Invalid

REST API for issues is in trunk only, not in 0.9.4 stable.
