Redmine - Feature #5623

Upgrade

2010-05-31 05:17 - Ali Ma'sum

Status:	Closed	**Start date:**	2010-05-31
Priority:	Normal	**Due date:**	2010-06-04
Assignee:		**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:			
Resolution:	Wont fix		

Description

where is
i can run **'rake config/initializers/session_store.rb'** and the others

so
i must open what program to run it (like command promp or ....)

i wish
make the upgrade procedure like update antivirus programs
so u must make autorun script to change database schema

Do you have a genuine installation problem, was this only a test or are you looking for a one-step installer for redmine?

- Assignee set to Felix Schäfer

i am so confused with a procedure to upgrade to new version of redmine

so i want the simple procedure to upgrade like antivirus programs

A web application is much more complex and inhabits way more variables than a desktop antivirus program. So you probably never will see a one-fits-all solution.

You can however look at the Debian/Ubuntu package or the Bitnami stack. These make installing/upgrading a bit easier. But it still does not save you from thinking. Another possibility would be to ask a commercial entity to help you setup and maintain your Redmine.
