

Redmine - Defect #5631

SVN integration broken, Redmine.pm and RedmineRepoControl.pm

2010-06-01 18:09 - Thomas Savant

Status:	Closed	Start date:	2010-06-01
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		

Description

When trying to enable the plugins Redmine or RedmineRepoControl for SVN integration, Redmine throws the errors listed beneath. FYI, we're running the site through Passenger.

for Redmine.pm:

```
[Tue Jun 01 18:03:45 2010] [error] [client 192.168.1.108] Use of uninitialized value $project_id in concatenation (.) or string at /usr/lib/perl/5.10/Apache/Redmine.pm line 282.\n
```

for RedmineRepoControl.pm:

```
[Tue Jun 01 18:01:42 2010] [error] [client 192.168.1.108] failed to resolve handler `Apache::Authn::RedmineRepoControl::access_handler': Can't locate Apache/Authn/RedmineRepoControl/access_handler.pm in @INC (current package not in PATH at line 1). (eval 6) line 3.\n
```

Apache configuration:

```
PerlLoadModule Apache::Redmine
<Location /svn>
DAV svn
#SVNParentPath "/home/subversion/repos"
SVNPath /home/subversion/repos
```

```
1. PerlAuthzHandler Apache::Authn::RedmineRepoControl::authz_handler
```

AuthType Basic

```
AuthName "Redmine SVN Repository"
Require valid-user
```

```
1. for mysql
```

```
RedmineDSN "DBI:mysql:database=our_redmine_db;host=our_db_server"
```

```
2. for postgres
```

```
1. RedmineDSN "DBI:Pg:dbname=databasename;host=my.db.server"
```

```
1. for SQLite3
```

```
2. RedmineDSN "DBI:SQLite:dbname=database.db"
```

```
RedmineDbUser "our_username"
```

```
RedmineDbPass "our_password"
```

```
RedmineCacheCredsMax 50
```

```
</Location>
```

- Status changed from New to Closed

- Resolution set to Invalid

Please use the forum if you need help.

As to your problem: there is no RedmineRepoControl.pm module, so that won't work, and the Redmine.pm will only work if you use SVNParentPath, not SVNPath. For more information see [Repositories access control with apache mod dav svn and mod perl](#).
