

Redmine - Defect #5718

Issue status in Subtasks issues

2010-06-21 11:57 - Javier Morueco

Status:	Closed	Start date:	2010-06-21
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
When you create a new subtask, you only can select "New" status for the new issue.			
I'm not sure if it's ok, because it's possible that you want to assign a subtask, or change the status of a subtask. For example to Resolved or Closed.			
The subtask issue status can not be changed.			
The parent issue status can not be changed.			
I think that it's useful allow to change subtask issue status as workflow permissions.			
Thanks

I'm not able to reproduce... Make sure the user trying this is also a member of the project (administrator is not sufficient as they are not allowed to break workflows and are considered not-member of projects they're not in).

- Status changed from New to Resolved

Hi Felix

I'm sorry, I was testing with the admin user, because I thought I could visualize everything and change everything, right, with a user assigned to the project works properly.

Thank you very much, I change the ticket to Resolved.

I will try this new useful feature correctly, with a valid project user.

Thanks again.
