

Redmine - Defect #5828

Incoming Emails settings = Rake Aborted! getaddrinfo: The storage control blocks were destroyed.

2010-07-07 05:28 - Leonardo De Araujo

Status:	Closed	Start date:	2010-07-07
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		

Description

Hi, I was following the instructions below to proceed with settings for incoming emails in redmine.

<http://www.redmine.org/wiki/redmine/RedmineReceivingEmails>

I have opted for the IMAP option.

The command is the following:

```
C:\Ruby187\bin>rake -f "c:\Program Files\redmine-0.9.5\Rakefile" redmine:email:receive_imap RAILS_ENV="production" host=imap.google.com username=redmine@xxxxxxxxxx.ca password=xxxxxxx ssl=SSL port=993 --trace
```

Results

(in C:/Ruby187/bin)

- Invoke redmine:email:receive_imap (first_time)
- Invoke environment (first_time)
- Execute environment
- Execute redmine:email:receive_imap

```
rake aborted!
getaddrinfo: The storage control blocks were destroyed.

```

Any help on idea on what is causing it?

I am Running it on Windows / mysql.

Thanks, help very appreciated.

Leonardo

getaddrinfo: The storage control blocks were destroyed.

That's your error, which from a quick google search boils down to the windows ruby not being able to handle IPv6.
