Description	
<p>I think it would be nice to have the ability to edit an update you made for an issue.</p> <p>For now you can only edit the issue itself, but not the updates. Each User should be able to edit his update, not updates of any other users. The admin should be able to edit all.</p>

Associated revisions

Revision 1152 - 2008-02-16 14:19 - Jean-Philippe Lang

Added the following permissions (#527, #585, #627):

- edit_issue_notes: let user edit any notes
- edit_own_issue_notes: let user edit his own notes only

History

#1 - 2008-02-02 06:03 - Jean-Philippe Lang

As of r1105, admins can edit issue notes.

I'll add a permission to let regular users edit their own notes.

#2 - 2008-01-28 13:26 - Sven Schuchmann

Yes, you are right! Only the notes.

(For now we have the Problem that we ran the Mantis Importer, and some notes contain unwanted Wiki-Formatting and we cannot change this)

#3 - 2008-01-28 13:17 - Jean-Philippe Lang

For data consistency, only the notes could be editable, not the changes (eg. the fact that a user changed the issue status can not be 'edited').

Did you have something else in mind ?

#4 - 2008-02-16 15:05 - Jean-Philippe Lang

- Category set to Issues

- Status changed from New to Closed

See r1152.
