Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
Hello,			
I did realize a problem when trying to filter for issues. A sample installation with two posted issues XXXXXX			
These are the steps to reproduce the behaviour as described above:			
- login by utilizing an user that is configured to use the role 'manager'			
- click on 'My Page'			
- click on 'View all issues'			
- Configure the filter settings:			
o old: status=all, author=is me			
o new: status=is new, author=is me			
- click on 'apply'			
- the next page is blank (the item list of fetched issues is empty and there are no controls available to refine the search. Just the header and the side bar are available)			
System Configuration:			

- configure Redmine to use MySQL 5.1			
- Linux Distribution: Ubuntu 10.04, x86-64			
- Redmine SVN Branch 0.9			
o no additional plugin's have been installed!			
o Redmine is running in 'production' mode			
- After initialization of the database the migration of issues from a Mantis v1.x installation has been performed without any error messages. Utilized encoding: ISO 8859-15)			
I did install Redmine from the following SVN branch:			

URL: http://redmine.rubyforge.org/svn/branches/0.9-stable			
Repository Root: http://redmine.rubyforge.org/svn			
Repository UUID: e93f8b46-1217-0410-a6f0-8f06a7374b81			
Revision: 3840			

History

#1 - 2010-07-15 12:52 - Mario Scondo

I'm sorry. The string 'XXXXX' in the description has to be replaced by the following problem description:

-> When trying to filter issues with the criteria 'is New' the resulting page is empty.

#2 - 2010-07-15 13:10 - Felix Schäfer

The rails MySQL adapter is currently not compatible with MySQL 5.1, please downgrade your MySQL installation and see if the problem persists.

#3 - 2010-07-15 13:29 - Mario Scondo

Are there any known problems with Postgres 8.3 and 8.4?

#4 - 2010-07-15 15:17 - Felix Schäfer

Holger Just on IRC:

pg 8.3 works well. 8.4 should work fine with trunk at least

#5 - 2010-07-15 15:18 - Felix Schäfer

But now that I thought of it a little, I think this is a problem fixed in trunk, but for which the fix has not been backported to 0.9. Have you tried searching for a similar issue here?

#6 - 2010-07-15 17:14 - Mario Scondo

I did not find issues related to 'filtering'.

While trying to migrate datasets from Mantis to Postgres 8.4 the script is failing... However, I think I have to install MySQL 5.0 to solve the problem.

#7 - 2010-07-15 18:33 - Mario Scondo

I did try to perform the migration and do the filtering with a MySQL 5.0.x backend and I was successful.

Thank you for your help.

#8 - 2010-07-15 18:33 - Mario Scondo

- Status changed from New to Resolved

#9 - 2010-07-15 18:42 - Felix Schäfer

- Status changed from Resolved to Closed

- Resolution set to Invalid

Happy to help :-)
