

Redmine - Defect #5888

{{toc}} macro doesn't get headers from {{include}}d pages

2010-07-15 20:21 - Alvaro Herrera

Status:	Closed	Start date:	2010-07-15
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Duplicate		
Description The TOC as created by the {{toc}} macro doesn't render headers contained within {{ include }} pages. This means that you can't use the included page as a self-contained identity, because then it wouldn't appear in the TOC in the main page it gets included in. What I was doing was partition a large document into subpieces, and then include each subpiece using {{ include }}. However this means the {{toc}} stops working properly.			
Related issues: Is duplicate of Redmine - Defect #3707: {{toc}} doesn't work with {{include}} <div>Closed2009-08-03</div>			

History

- Status changed from New to Closed
- Resolution set to Duplicate

I close this one as duplicate, see #3707.
If you want to help please avoid to copy/paste so long wiki pages, it's pretty difficult to read... Thank you for reporting

#2 - 2010-07-19 21:23 - Alvaro Herrera

I didn't copy/paste any page -- I just used the problematic macro (brace-brace-include-closebrace-closebrace). It seems the wiki formatting expanded it into the initial page of this wiki. Sorry for the noise.

I note that I didn't find #3707 because it's not correctly categorized.

#3 - 2010-07-19 23:27 - Mischa The Evil

Fixed the issue-description and added correct issue-relation to #3707.
