Description

Hi all,

We've been using Redmine at our company for almost 2 years and we love it. One feature that would be beneficial to us is the ability to upload large (> 1GB) files to the 'Files' section of projects. This would be accompanied by a nice progress bar.

Would it be tough to integrate something like Uber-Uploader (http://uber-uploader.sourceforge.net/)?

Thanks!

Has anyone been able to implement something like this? The size of files today really makes this a necessity.

This seems to be a duplicate of #3957. Both issues with zero activity since about a year ago...

I also feel this particular need and would very much like to contribute to addressing this. However, I have zero Ruby skills and a couple of very rough shots I've given it failed miserably... :/ No surprise.

How can we make this happen? :)

Indeed.
