

Redmine - Defect #6010

">" is converted to "&gt;" when using the page-include macro

2010-07-31 16:55 - Viktor Petersson

Status:	Closed	Start date:	2010-07-31
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:		Affected version:	0.9.6
Resolution:	Invalid		
<b>Description</b> <p>There appears to be a bug in the page-include macro for the wiki. When including a page that contains the character "&gt;", it will be displayed as "&amp;gt;".</p> <p>How to replicate:</p> <ul style="list-style-type: none"><li>• Create a wiki-page with some text that includes a &gt; (ex. "echo hello &gt;&gt; /tmp/foobar").</li><li>• Create another wiki-page and include the previous page with the include macro<ul style="list-style-type: none"><li>◦ I'm unable to write out the include command but you guys probably know it (if not, it's explained <a href="#">here</a>)</li></ul></li></ul> <p><b>System info:</b> FreeBSD 7.1 Redmine 0.9.6.stable Ruby 1.8.7.248,1 MySQL 5.5.3</p>			

History

#1 - 2010-07-31 23:32 - Felix Schäfer

Can't reproduce on current trunk, see <http://orga.fachschaffen.org/projects/sandbox/wiki/Wiki> which includes <http://orga.fachschaffen.org/projects/sandbox/wiki/Test> .

#2 - 2010-08-03 11:10 - Viktor Petersson

- Status changed from New to Resolved

Yes, appears as it have been resolved in the latest branch (or it was something in my setup). I wasn't able to reproduce the issue in the demo-setup: <http://demo.redmine.org/projects/ticketsixtyten/wiki/IncludePage>

#3 - 2010-08-03 13:44 - Felix Schäfer

- Status changed from Resolved to Closed
- Resolution set to Invalid
