

Redmine - Feature #6033

Allow addition/removal of subtasks to show in parent's History block

2010-08-04 16:50 - Mark P

Target version:	4.2.0		
Resolution:			
Description			
<p>The subtask feature has been working as expected. When I remove a parent from a child, that change is captured in the child's history, but it does not appear in the parent's history. I think it would be really handy to be able to see from the parent's perspective, how many child issues came and went. Seeing history like this viewing from the child up to the parent is a tad cumbersome. Hopefully, that makes sense.</p> <p>Bravo Zulu on Redmine.</p>			

History

#1 - 2018-01-04 12:50 - Go MAEDA

- Category set to Issues

#2 - 2019-08-16 04:25 - Yuichi HARADA

- File 6033_subtasks_show_in_parent_history.patch added

Display the addition / deletion of subtask issues in the parent issue's history block.

I attached a patch.

#3 - 2019-08-18 15:00 - Go MAEDA

- Target version set to Candidate for next major release

#4 - 2019-09-16 14:43 - Go MAEDA
