

Redmine - Feature #6034

sorting should disregard blank fields

2010-08-04 20:51 - Josh Sharpe

Status: New	Start date: 2010-08-04
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Issues list	Estimated time: 0.00 hour
Target version:	
Resolution:	
Description When sorting something in ascending order all the issues that have a blank value for this field are first in the list. Instead, anything that does not have a value should be pushed to the end of the list. They are essentially undefined. If I'm sorting a list of 300 issues by version number, I'm not asking to see the blank ones first -- I'm asking to see the lowest version number first.

Do you have update about this issue ?

It's a very disturbing issue, because for example, if you sort by Due Date or Start Date, empty issue appear first, and after that, late (and urgent) tasks.

Issue with empty date must appear at the end (far in the futur), and not far in past.

If they don't have any date, that's propably because they are not urgent at all ...
