Redmine - Defect #6081

Get error when trying to set environment to something other then development, test or production

2010-08-09 04:55 - Roy Nielsen

Status:	Closed		Start date:	2010-08-09
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	0.9.3

Description

Error:
undefined method `[]' for nil:NilClass
Exception class:
NoMethodError

OS Ubuntu 10.4
redmine 0.9.3-1 (came with the distro)

Yes, I've set the /etc/redmine/default/database.yml to add:

```
to_migrate:
  adapter: mysql
  database: to_migrate
  host: localhost
  port:
  username: redmine
  password: <mypass>
  encoding: utf8
```

environment.rb to have the following RAILS_ENV:
ENV['RAILS_ENV'] ||= 'to_migrate'

and made a to_migrate.rb (a copy of the development.rb file)

When I do all those things for development or production, it works... Trying to do something other gives the error above.

History

#1 - 2010-08-09 22:49 - Holger Just

- Category deleted (Website (redmine.org))

- Assignee deleted (Jean-Philippe Lang)

Ubuntu ships with a patched version if Redmine, so it is very likely that this issues is caused by the patches.

Please at least provide a full trace of the error so we can check.

#2 - 2010-08-09 23:13 - Roy Nielsen

Hello,

The page I get yields:

These are the possible causes:

```
*
      There may be a syntax error in the application's code. Please check for such errors and fix them.
*
      A required library may not installed. Please install all libraries that this application requires.
*
      The application may not be properly configured. Please check whether all configuration files are written
 correctly, fix any incorrect configurations, and restart this application.
*
```

```
     A service that the application relies on (such as the database server or the Ferret search engine server
) may not have been started. Please start that service.
```

Further information about the error may have been written to the application's log file. Please check it in order to analyse the problem.

Each environment needs a file in config/environments/NAME.rb. Development, test, and production are already included. Try copying production (or development) to create your to_migrate.rb environment.

#4 - 2010-09-05 23:58 - Roy Nielsen

Hello,

I tried copying the development.rb to a to_migrate.rb file, as well as changing the database.yml & environment.rb file.

I don't see where you say to do something different.

Unfortunately I've had to go to separate bitnami installations to solve my issue.

It would be nice if what you and I describe actually works.

Maybe it works on a newer version of redmine than ships with ubuntu 10.4?

Regards,
-Roy

#5 - 2017-04-26 11:00 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Invalid

Redmine 0.9.3 is too old and not maintained any longer.
Closing this issue.

#6 - 2017-04-26 16:52 - Toshi MARUYAMA

- Description updated
