

Redmine - Feature #6104

Assign CSS classes for the "Custom queries" and the "issue" a-tags

Description All the links on the right hand are stylewise not customizable, as there are no CSS classes attached to the a-tags. 1) Easy solution Add a class="issue_links" and class="custom_queries_links" to the a-tag 2) Enhanced solution Add classes from solution 1 AND add a generic class to each item class="issue_links issue_link_01" hr. 3) Best solution Like solution 2 but let the user select a predefined group or category for his custom query. This category could be defined within a new tab of the administrator's view where the name and the custom class would be defined.
