

Redmine - Patch #6107

Modify reposman.rb to delete a project on the repository when this project has been deleted on redmine

2010-08-11 18:40 - José Cano

Status:	New	Start date:	2010-08-11
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM extra	Estimated time:	0.00 hour
Target version:			
Description reposman.rb must run as a cron job to enable the automatically project creation on the repository server, when a project has been created on redmine. It does not already implement automatic project deletion on the repository. This patch try to achieve it for SVN repository, git repository must still be implemented.
