

Redmine - Feature #6153

Move view_calendar and view_gantt to own modules

2010-08-17 13:21 - Holger Just

Status:	Closed	Start date:	2010-08-17
Priority:	Normal	Due date:	
Assignee:	Eric Davis	% Done:	100%
Category:	Projects	Estimated time:	0.00 hour
Target version:	1.0.1		
Resolution:	Fixed		

Description

In [r3943](#) and [r3944](#), Eric added the gantt chart and calendar view as tabs to the project menu.

While this change makes both much more visible, it also some of the scarce "tab-space" on small-to-medium sized screens. Especially, if it is not really used for most projects. To allow to enable / disable the calendar and gantt view per project, please move the permissions to their own respective modules.

Also, I think, these tabs belong near the activity tab, as they are often used to get a project overview. So it would be great to move these tabs directly to the right of the activity tab.

Associated revisions

Revision 4013 - 2010-08-22 20:42 - Eric Davis

Treat Calendar and Gantt pages as separate modules. #6153

This will let the Issue Tracking, Gantt, and Calendar modules be enabled or disabled as needed. A database migration will enable the Gantt and Calendar for all existing projects that have Issue Tracking enabled.

Revision 4036 - 2010-08-23 21:39 - Azamat Hackimov

Adding missed new strings for #6153:

- project_module_gantt: Gantt
- project_module_calendar: Calendar

History

#1 - 2010-08-18 01:41 - Eric Davis

Putting them into their own modules is a good idea.

#2 - 2010-08-18 18:04 - Adam Soltys

I may try to tackle this one. Can someone add me to this site as a contributor so I can assign myself tickets?

#3 - 2010-08-19 07:12 - Adam Soltys

- *File calendar_and_gantt_as_modules.diff added*
- *Assignee set to Eric Davis*

I think I've got it working. Patch attached. Github branch: http://github.com/asoltys/redmine/tree/calendar_and_gantt_as_modules

Eric, I sent you a pull request. Couldn't add you as a watcher to this issue so I'll just assign it to you instead.

#4 - 2010-08-19 16:56 - Eric Davis

- *Status changed from New to 7*
- *Target version set to 1.0.1*

We'll also need a migration to add these two modules for every project that had issues tracking on.

#5 - 2010-08-19 23:03 - Adam Soltys

- File `calendar_and_gantt_as_modules.diff` added

Whoops, I had actually thought of that and written the migration but my `db/` folder was gitignore'd. I figured this out by rm'ing the file to see if git would recognize it as missing. When it didn't, I clued in that it was ignored, and that I'd just rm'ed the migration, with no way to restore it! lol!

Anyways, here it is again, with the migration included.

#6 - 2010-08-22 20:40 - Eric Davis

- *Category set to Projects*
- *Status changed from 7 to Resolved*
- *% Done changed from 0 to 100*
- *Resolution set to Fixed*

Applied Adam Soltys's patched from Github. Thanks for the contributions, I really like having these as separate modules. ([r4013](#))

#7 - 2010-08-22 21:47 - Eric Davis

Merged to 1.0-stable.

#8 - 2010-08-22 21:48 - Eric Davis

- *Status changed from Resolved to Closed*

#9 - 2010-08-23 21:44 - Azamat Hackimov

There missed two translation strings for new modules:

project_module_gantt: Gantt
project_module_calendar: Calendar

Fixed in [r4036](#).
