

Redmine - Defect #6182

Localized decimal numbers

2010-08-20 11:04 - Petr Pospisil

Status:	New	Start date:	2010-08-20
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	I18n	Estimated time:	0.00 hour
Target version:	Candidate for next major release	Affected version:	
Resolution:			
Description			
<p>Hi, how do I adjust the settings so I can enter localized decimal numbers to custom fields? I cannot find something to change decimal point to decimal comma. The "number.human.format.*" in the locals has effect only to show form (included in helpers - number_to_currency etc.). If you are adding a new numbers the english format is forced.</p> <p>I have founded http://github.com/clemens/delocalize or http://gem-session.com/2010/03/how-to-use-the-comma-as-decimal-separator-in-rails-activerecord-columns-and-text-fields, but pulling a cat's tail seems to be better fun :-).</p> <p>Thanks for a reply. Regards Petr</p>
