Description			
Hello,			
We do not have dependent list box in redmine.			
Basically I want to have a list box whose value depends on the value of another list box.			
For example. Lets Say there are two list boxes Status and State.			
State - List box have values 1. Open, 2. Closed, 3. Oh-Hold			
So based on this state list box value, the status list box values must change.			
Can this be implemented?			
Thanks,			
Deepak.
