Description	
<p>Hello,</p> <p>We do not have dependent list box in redmine. Basically I want to have a list box whose value depends on the value of another list box.</p> <p>For example. Lets Say there are two list boxes Status and State. State - List box have values 1. Open, 2. Closed, 3. Oh-Hold So based on this state list box value, the status list box values must change.</p> <p>Can this be implemented?</p> <p>Thanks, Deepak.</p>
