

## Redmine - Feature #6395

### Git Notes

2010-09-14 21:33 - Eric Thomas

<b>Status:</b>	New	<b>Start date:</b>	2010-09-14
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	SCM	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b>			
A relatively new, but useful feature of git are <a href="#">git notes</a> . Redmine currently does not handle notes correctly. GitHub recently rolled out with <a href="#">support</a> of notes. Perhaps redmine could do something similar.

I like this feature, at least to add support display notes online as first step,

Would be great to have commit-to-ticket relations under a given notes-ref.

For example:

```
git notes --ref=redmine add -m "see #18271"
```

The related commit should be displayed (like already done by commits containing such a relation directly) on the ticket's details page.

This would separate the actual commit message (what have been done) and the relation to redmine tickets into a separate namespace.

Imho this is cleaner than having the relation in the commit message itself.

+1. too many times committers forgot Issue # tagging. Notes could be a good way to handle this at the repository side.
