

Redmine - Patch #6416

When viewing utf-8 text file in repository, it is downloaded

2010-09-16 17:37 - Masahiro Tomita

Description I want to view the utf-8 text file in repository, but it is downloaded. In RepositoriesController#entry(), String#is_binary_data? is used to determine the file is binary or not. But String#is_binary_data? return true even if the file is utf-8 text. I wrote a patch to fix this problem.	
Related issues: Related to Redmine - Defect #6256: Redmine considers non ASCII and UTF-16 tex... Closed 2010-08-31

I want to confirm this bug. Some files in utf-8 encoding are downloading instead of showing.

#2 - 2011-01-18 06:19 - Toshi MARUYAMA

- Category set to SCM

#3 - 2011-03-21 10:53 - Toshi MARUYAMA

- Status changed from New to 7

- Assignee set to Toshi MARUYAMA

#4 - 2011-03-21 11:02 - Toshi MARUYAMA

- Status changed from 7 to Closed

- Assignee deleted (Toshi MARUYAMA)

I confirmed [source:trunk/config/locales/ja.yml](#) is as binary.
[repositories_controller.patch](#) is only for UTF-8.
Redmine supports multi encoding.
For example, ISO-8859-1, Japanese Shift_JIS, EUC-JP...
Iconv passes converting from ISO-8859-1 to UTF-8 with no error.

I will fix [#6256](#) in another way.
