<b>Target version:</b>	
<b>Resolution:</b>	
<b>Description</b>	
<p>The wiki-page [[RedmineInstall#Logger-Configuration]] currently shows</p> <pre># Use the log-rotation from logger config.logger = Logger.new(config.log_path, 7, 1048576)</pre> <p>It might be a good idea to add the setting of the log level as well, i.e.</p> <pre># Use the log-rotation from logger config.logger = Logger.new(config.log_path, 7, 1048576) config.logger.level = Logger::INFO</pre> <p>This is important, because otherwise the log level defaults back to :DEBUG otherwise.</p>

I just did, thanks for the reminder :-)

(as a side-note: it's a wiki page, I think you should be able to edit it yourself should the need arise again)
