

Redmine - Patch #6498

Make options parameter optional in User#allowed_to_globally?

2010-09-26 20:13 - Jan from Planio www.plan.io

Status:	Closed	Start date:	2010-09-26
Priority:	Normal	Due date:	
Assignee:	Jean-Baptiste Barth	% Done:	0%
Category:	Permissions and roles	Estimated time:	0.00 hour
Target version:	2.6.0		
Description			
It's optional in allowed_to? so it would make sense to make it optional in allowed_to_globally?, too.			
Patch is attached.			

Associated revisions

Revision 13364 - 2014-09-06 05:39 - Jean-Baptiste Barth

Make 2nd parameter optional in User#allowed_to_globally? for consistency (#6498).

- Assignee set to Jean-Baptiste Barth
- Target version set to 2.6.0

Yes obviously. This method is not used anywhere in the Redmine code base anymore, but I find lots of usages in plugins on Github (https://github.com/search?o=desc&q=allowed_to_globally&s=indexed&type=Code)

On a side note Jan: I'm trying to spend some time reviewing/merging patches these days, and obviously 4 years old patches with not even a reply are ridiculous. If you want to drop me an email with things you think I can merge directly, let me know (or we can chat about that on freenode eventually, nick=salvor but my IRC client is at \$WORK so I'm only behind on weekdays).
