Description

When setting filter(containing "ПМ" in subject) on Russian(I"ve tryed "ПМ", "*ПМ*","/ПМ"), system shows nothing. I have many issuses looking like "№/ПМ". Sorry for my English.

History

I have no problems with filtration by subject in Russian. Using version 1.1.2.
Are you sure that 'M' in subjects and in filter are both Russian chars? :)

I'm sure:) I'm using 1.1.0 now. I didn't have such problem in 0.9.x, so I'll update soon. Also, I have it running on Linux with UTF-8, users were creating issuses on Windows, and I'm trying to search from Linux. Could it be encoding problem?
