

Redmine - Defect #6590

Wrong file list link in email notification on new file upload

2010-10-07 00:51 - Christian Hausleitner

Status:	Closed	Start date:	2010-10-06
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:	1.1.3	Affected version:	1.0.2
Resolution:	Fixed		

Description

The link in the email pointing to the file list leads to a 403 error (You are not authorized to access this page.).

E.g. the file list link in the email is: http://host/redmine/projects/list_files/projectXY

(instead of <http://host/redmine/projects/projectXY/files>)

BR, Christian

```
Redmine version      1.0.2 stable
Ruby version         1.8.7 (i386-mingw32)

Associated revisions

Revision 5230 - 2011-03-27 18:38 - Jean-Philippe Lang

Fixed links in new file notification broken by r4051 (#6590).

History

#1 - 2011-01-25 12:24 - Vladimir Ch

Same problem!

```
Redmine version 1.0.4 stable
Ruby version 1.8.7 (i386-mingw32)
Environment: production
Database adapter mysql
Database version MySQL 5.0.90
```

#2 - 2011-01-31 04:16 - Vladimir Ch

- File redmine.png added

In version 1.1 the error still persists.
PS: Windows 2003 Server

#3 - 2011-02-21 12:24 - Sebastian Maj

Is there any chances that this problem will be fixed soon? It's really annoying.

#4 - 2011-03-09 12:01 - Kseniya Shestakova

In app/models/mailer.rb

```
def attachments_added(attachments)
  container = attachments.first.container
  added_to = ''
  added_to_url = ''
  case container.class.name
  when 'Project'
-     added_to_url = url_for(:controller => 'projects', :action => 'list_files', :id => container)
+     added_to_url = url_for(:controller => 'files', :action => 'index', :project_id => container)
    added_to = "#{l(:label_project)}: #{container}"
    recipients container.project.notified_users.select {|user| user.allowed_to?(:view_files, container.project)}
  when 'Version'
-     added_to_url = url_for(:controller => 'projects', :action => 'list_files', :id => container)
+     added_to_url = url_for(:controller => 'files', :action => 'index', :project_id => container)
    added_to = "#{l(:label_version)}: #{container.name}"
    recipients container.project.notified_users.select {|user| user.allowed_to?(:view_files, container.project)}
  when 'Document'
    added_to_url = url_for(:controller => 'documents', :action => 'show', :id => container.id)
    added_to = "#{l(:label_document)}: #{container.title}"
    recipients container.recipients
  end
  redmine_headers 'Project' => container.project.identifier
  subject "[#{container.project.name}] #{l(:label_attachment_new)}"
  body :attachments => attachments,
       :added_to => added_to,
       :added_to_url => added_to_url
  render_multipart('attachments_added', body)
end
```

#5 - 2011-03-17 11:35 - Karel Pičman

In case of Version there should be container.project_id

```
when 'Version'
-     added_to_url = url_for(:controller => 'projects', :action => 'list_files', :id => container)
+     added_to_url = url_for(:controller => 'files', :action => 'index', :project_id => container.project_id)
    added_to = "#{l(:label_version)}: #{container.name}"
    recipients container.project.notified_users.select {|user| user.allowed_to?(:view_files, container.project)}
  when 'Document'
```

#6 - 2011-03-17 12:05 - Etienne Massip

- Target version set to Candidate for next minor release

#7 - 2011-03-18 08:33 - Karel Pičman

- File mailer.rb.patch added

Here is a patch

#8 - 2011-03-27 18:38 - Jean-Philippe Lang

- Status changed from New to Resolved

- Target version changed from Candidate for next minor release to 1.1.3

- Resolution set to Fixed

Fixed in [r5230](#), thanks.

#9 - 2011-04-29 09:02 - Jean-Philippe Lang

- *Status changed from Resolved to Closed*
