Description

Hi.

Current numbering with # symbold generates the following list:
1. Item 1
2. Item 2
1. Item 2.1
2. Item 2.2

I want you to support the following type of list (note the numbering style of subitems):
1. Item 1
2. Item 2
2.1. Item 2.1
2.2. Item 2.2

History

#1 - 2010-10-12 22:42 - Felix Schäfer

- Status changed from New to Closed

- Resolution set to Wont fix

You can get:

1. A
2. B
   1. B.A
   2. B.B

Already, I think the style of the list numbering is a CSS issue as it is done at render time. Anyway, the textile markup is provided by redcloth, you might want to dig a little in that direction.
