Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Wont fix		**Affected version:**	1.0.2

Description

This code in .htaccess creates a problem when you have mod_fastcgi or such, but running rails under passenger apache module.

```
<IfModule mod_fastcgi.c>
        RewriteRule ^(.*)$ dispatch.fcgi [QSA,L]
</IfModule>
<IfModule mod_fcgid.c>
        RewriteRule ^(.*)$ dispatch.fcgi [QSA,L]
</IfModule>
<IfModule mod_cgi.c>
        RewriteRule ^(.*)$ dispatch.cgi [QSA,L]
</IfModule>
```

- Status changed from New to Closed

- Resolution set to Wont fix

You don't need the .htaccess file with passenger at all. A common (and recommended) setup is therefore to use the following statement inside your Apache configuration to disable processing of .htaccess files:

```
AllowOverride none
```

Another variant would be to just remove the .htaccess file completely.

There are just no other ways. You can't really tell whether the installed module is actually used or not.
