History

#1 - 2010-10-28 00:49 - Jean-Baptiste Barth

- Category set to Text formatting

- Status changed from New to 7

- Assignee set to Jean-Baptiste Barth

- Target version set to 1.1.0

Good idea, but it comes with some (minor) problems:

- it should have some unit tests
- link_to_user helper doesn't work the same as other link_to_* ; we can't add only_path option nor css classes easily

I'll have a look at it before 1.1.0.

#2 - 2010-12-12 17:07 - Jean-Philippe Lang

The problem with this patch is that it breaks the users privacy. It would allow someone to see the name of any user, which is not what UsersController#show does.

#3 - 2010-12-18 14:49 - Jean-Philippe Lang

- Target version changed from 1.1.0 to Unplanned backlogs

1.1 feature freeze.

#4 - 2011-04-14 11:57 - Etienne Massip

- Target version changed from Unplanned backlogs to Candidate for next major release

#5 - 2012-05-14 17:15 - Josh Nijenhuis

Will this allow multiple users?

```
User:me,you,who
```

It's very unlikely, mainly for consistency with other link types.

This feature request, as well as a first implementation approach, seems to stick around here for quite some time now. I would greatly appreciate this feature, as we could include references to contact persons qite easily.

I would also greatly appreciate this enhancement. Does not seem to be a big deal! :-)

Link to user profile was committed in [#4179](). The following syntaxes are supported:

- [kurumi kurogi]()
- [kurumi kurogi]()

and a new proposal was made to support also user:1.

I think that we can close this issue too.

Indeed. Closing it as a duplicate of [#4179](#4179).
