

Redmine - Defect #6691

get a message of "no such file to load -- script/../config/boot (LoadError)"

2010-10-18 10:06 - Luke Lujing

Status:	Closed	Start date:	2010-10-18
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	1.0.2
Resolution:	Invalid		
Description			
<p>when I install redmine-1.0.2, I use:</p> <ul style="list-style-type: none">• MySQL5.0.2• ruby3.0• abstract (1.0.0)• actionmailer (3.0.0)• actionpack (3.0.0)• activemodel (3.0.0)• activerecord (3.0.0)• activeresource (3.0.0)• activesupport (3.0.0)• arel (1.0.1)• builder (2.1.2)• bundler (1.0.2)• erubis (2.6.6)• i18n (0.4.1)• mail (2.2.7)• mime-types (1.16)• minitest (1.6.0)• mysql (2.8.1)• polyglot (0.3.1)• rack (1.2.1, 1.0.1)• rack-mount (0.6.13)• rack-test (0.5.6)• rails (3.0.0)• railties (3.0.0)• rake (0.8.7)• rdoc (2.5.8)• thor (0.14.3)• treetop (1.4.8)• tzinfo (0.3.23) <p>and I just follow the installation guide(http://www.redmine.org/wiki/redmine/RedmineInstall#Installation), everything is OK at first, but when I run the command: <code>ruby script/server webrick -e production</code>, it prompt as follow:</p> <pre><internal:lib/rubygems/custom_require>:29:in `require': no such file to load -- script/../config/boot (LoadError) from <internal:lib/rubygems/custom_require>:29:in `require' from script/about:2:in `<main>'</pre> <p>and, when I install ruby, I used a target directory <code>"/usr/local/ruby"</code>. I found some infomation on web that said maybe that is the reason...</p> <p>but how can I fix it? or it's a bug of redmine-1.0.2?</p>			

History

#1 - 2010-10-18 10:17 - Felix Schäfer

- Status changed from New to Closed
- Resolution set to Invalid

You seem to be 2 steps too far, see a few lines up in the [RedmineInstall](#) guide, and you'll see rails 3 is not supported.

Furthermore, please visit the forums for support, especially regarding installation.

#2 - 2010-10-19 03:42 - Luke Lujing

shame...& thx a lot for you help!
