Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	1.0.1

Description

Hey,

I am experiencing a weird issue.
Redmine works perfectly fine but on one task, it started to hang.
It just doesn't do anything, no log entries, no nothing.
Any idea how can I debug this?
adding
config.log_level = :debug
into config/additional_environment.rb
did not change anything, not a single entry in the log when I click that specific issue link.

- Status changed from New to Resolved

ok. forget it. this was stupid.
it always happens that you find the problem when you submit the bug.
it turned out, that I had another window on the second desktop, that was blocking entry to THIS ONE issue, because it hanged on certificate verification.
really weird but anyway, it works :)

#2 - 2010-10-23 16:45 - Jean-Philippe Lang

- Status changed from Resolved to Closed

- Resolution set to Invalid

OK, thanks.
