

Redmine - Defect #6802

Autolinking should not occur in link titles

2010-11-02 18:00 - Alejandro Mery

Status:	New	Start date:	2010-11-02
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Text formatting	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
In <code>[[www www.example.org]]</code> the title incorrectly gets converted into an external link.			
Using 1.0-stable branch.			

History

#1 - 2010-11-02 18:22 - Holger Just

- Subject changed from *autolinking should not occur for titles* to *Autolinking should not occur in link titles*
- Category set to *Text formatting*
- Affected version (unused) set to *devel*

The issue is actually the other way round. The auto linking of URLs (performed by `inline_auto_link` in `textile/formatter` occurs first, the wiki link is only generated after than.

Thus, the above statement is transformed into:

Current behavior

- `[[www|www.example.org]]`
- `[[www|www.example.org]]`
- `www.example.org`

Expected

- `[[www|www.example.org]]`
- `www.example.org`

This might be solved by reordering rendering methods in `source:trunk/app/helpers/application_helper.rb#L453` in a way that `parse_wiki_links` runs before `inline_auto_link`. Maybe, these methods need to be included into the textile implementation in `source:trunk/lib/redmine/wiki_formatting/textile` in the correct ordering.

#2 - 2010-11-07 15:46 - Jean-Philippe Lang

Redmine links (eg. wiki, ticket links...) should not be handled by the builtin text formatter so we can easily switch to another one.

Maybe we could fix `inline_auto_link` instead.

#3 - 2018-09-15 03:42 - Go MAEDA

This issue seems to be fixed in Textile. I could not reproduce on Redmine 3.4.6.devel.17477. But it still does not work as expected in Markdown.

#4 - 2018-09-15 22:10 - Alejandro Mery

- Status changed from New to Resolved
