

## Redmine - Feature #6816

### Group Parent task with subtask underneath

<b>Description</b>	
<p>I like how the new redmine lets you group the queries by tracker, but it would be great if you could group by parent task and show the sub-task under it, or if there is a ticket that is a parent with sub-task to show a plus sign that would display the sub-task tickets underneath when clicked.</p>
