

Redmine - Defect #6837

The new project link path is wrong in project show views

2010-11-05 10:52 - Olivier Farlotti

Status:	Closed	Start date:	2010-11-05
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	1.0.3
Resolution:	Cant reproduce		
Description			
Error 404 on /projects/add			
The path should be /projets/new to work			
I tried to invastigate quickly in root.rb, application_helper.rb, projects_controller.rb, /view/projects/show.rhtml and all seems to be ok. I just dont understand			

History

#1 - 2010-11-05 11:10 - Felix Schäfer

It was add and now is new since [r4069](#), which has been merged in stable for 1.0.3. Did you restart your redmine and everything else in between after updating? What link did you click on that took you to add?

#2 - 2010-11-05 14:06 - Olivier Farlotti

Yes i noticed the change from add to new and I restarted Redmine after the cache and session clearing (upgrade from 0.9 to 1.0.3).

The fact is the "new (sub)project" link is well formed in /admin/projects but not in /projects and /projctcs/<project slug>

I use Redmine in a french environment but i guess it does'nt matter

#3 - 2010-11-05 17:40 - Axel B.

Have a look at the plugins you may have installed. I had the same issue and had a plugin, which extends/ overwrites the project show view (template). After updating merging the plugin template with the new default one everything worked fine again.

#4 - 2010-11-14 11:05 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Cant reproduce

#5 - 2010-11-16 17:27 - Jiri Kubica

Small update - in my Redmine it was problem with plugin *redmine_project_filtering*
./vendor/plugins/redmine_project_filtering/app/views/projects/index.rhtml
