I think, you should use

0.01
0.02
0.11
0.20

If you want to change the version number from 0.1 to 0.01, I think, you can do that.

#2 - 2010-11-13 11:47 - Jean-Philippe Lang

- Tracker changed from Defect to Feature
- Subject changed from Roadmap, Version Error to Version numbering sort
- Priority changed from High to Normal

Versions are sorted by date then by name (alphabetically), so what you describe is not a defect (1.1 < 1.10 < 1.2 is alphabetically correct). What you expect is some kind of version numbering sort when names looks like x.y where x and y are integers.

Are it not any way to first sort them after numbering?

/ Slaktarn

Or atleast if that not possibel first store after date and not name to get it right anyways it culd be a workaround

#5 - 2011-05-06 10:41 - Ebrahim Mohammadi

I don't know of any versioning scheme in which "1.10" is smaller than "1.2". I think this issue deserves a higher priority, or even it could be set as a "defect".

#6 - 2019-02-03 00:32 - Go MAEDA

- Duplicated by Defect #28035: Order of versions is not correctly ordered added

#7 - 2021-07-31 19:00 - Frank Schwarz

I guess the reason for this ticket not being solved within 10 years is the fact that there is no one-size-fits-all solution.

However, if you would refactor the code for the internal version sort to be extensible, I could help myself with a plugin.
