Description	
<p>We using some plugins and now we have about 14 tabs in project menue if all modules are enabled. Would be nice if we could at least configure the order from left to right the tabs shall be shown and if they shall be shown or not</p> <p>e.g Activity>New Issue>PluginsTab1>Overview>Roadmap>Wiki>PluginsTab2>...</p> <p>and don't even show the "Issues" tab, for example,</p>

Is there any update to this? Is it possible to order tabs?

I'd say it's remotely related to #15880. This would allow plugins to create or hook into sub menus to save space.
