

Redmine - Defect #6992

wrong list number after table

2010-11-27 02:54 - Andras Elso

Status:	New	Start date:	2010-11-27
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Text formatting	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			

Description

Sample code:

```
# list1
|_. Test|_. Test2|
|Testing|And yet another test|

# list2
```

Current result:

1. list1

Test	Test2
Testing	And yet another test

1. list2

But the second list2 should be 2. list2.

Hi,

The latter list is another list, not the tail of the first one.

Another question arises: is it possible to set beginning value of a numbered list.

#2 - 2010-11-27 11:05 - Andras Elso

The latter list is another list, not the tail of the first one.

No, because the table sould end with two newline char or one \Z char (whatever is that :o). So if i want to a new list after a table, i sould use 3 newlinechar.

I'd say that's a bug with textile, might be better when/if we migrate to the current version of the textile formatter.
