Redmine - Feature #7020

Auto assign default version on new issue

Description

It would be good to create default version that issues are assigned to. This ticket is related to #6117.

Scenario: project has 3 versions

- production/live
- upcoming: new reports
- upcoming: new admin interface

It would be great if I could assign default version. This could work similarly as default assign-to based on categories. If no version specified, pick the default one.

Kind regards

Adam Żochowski

Isn't this a dupe for #1828?
