

Redmine - Defect #7102

Wrong URL if using batch ticket creation

2010-12-13 16:26 - Terence Mill

Status:	Closed	Start date:	2010-12-13
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	1.0.2
Resolution:	Cant reproduce		
Description lg i click "create ticket + next ticket" on ticket form i get Sucessfully created 404 The page you were trying to access doesn't exist or has been removed.. Back The Url redmine opens after ticket creation for new ticket seems wrong to me. /issues/new?issue[tracker_id]=2 The url should be... /projects/sandbox/issues/new?[tracker_id]=2			

History

#1 - 2010-12-14 19:48 - Jean-Philippe Lang

I'm not able to reproduce with trunk or 1.0-stable.

#2 - 2010-12-15 17:13 - Terence Mill

Well, we use 1.02.
Maybe its a plugin, but is there a hook or cutting point the plugin can overwrite only the "create and next issue" request?
We don't have problems with creation of tickets itself, but the url created for new issue redirect seems to be wrong.
I you you would gave me some ideas where to look and what to search i could try to isolate the cause.

Tx for support!

#3 - 2010-12-15 17:18 - Terence Mill

For example:
Here is the html part of the site where the button is defined which does the "create and next issue" server request.

```
<input name="continue" type="submit" value="Anlegen + nächstes Ticket" />
<a accesskey="r" href="#" onclick="new Ajax.Updater('preview', '/issues/preview?project_id=spielwiese', {a
synchronous:true, evalScripts:true, method:'post', onComplete:function(request){Element.scrollTo('preview')},
parameters:Form.serialize('issue-form') + '&authenticity_token=' + encodeURIComponent('7xiDhPzkm7mlca4IHN7
GpOJ7IASTDJa3KiAQdmGZW3o=')}); return false;">Vorschau</a>

<script type="text/javascript">
</script>
```

I am not able to reproduce with the current trunk too... Which plugins do you have installed?

#5 - 2010-12-16 11:04 - Terence Mill

At the moment the test system is setup with this plugins:

- acts_as_activity_provider redmine_contacts
- acts_as_attachable redmine_doodles
- acts_as_customizable redmine_embedded_video

acts_as_event redmine_goyello_stuff_to_do
acts_as_list redmine-graphs-plugin
acts_as_searchable redmine_hudson
acts_as_tree redmine_icalendar_export
acts_as_versioned redmine_importer
acts_as_watchable redmine_local_avatars
awesome_nested_set redmine_logs
classic_pagination redmine_messenger
coderay-0.9.2 redmine_mylyn_connector
engines redmine_my_widgets
gravatar redmine_opensearch
open_flash_chart redmine_screenshot_paste-1.1.0
open_id_authentication redmine-system-notification-plugin
pluginslist.txt redmine_vote
prepend_engine_views redmine_wikicreole_formatter
projects_tree_view redmine_wiki_extensions
question_plugin redmine_wiki_unc
redmine_bbb redmine_workflow_viz
redmine_boards_watchers redmine_xls_export
redmine_charts rfpdf
redmine_checkout ruby-net-ldap-0.0.4
redmine_code_review

That's a hole bunch of plugins. Most likely there is at least one which probably overwrites the respective cores views which you are experiencing. Try to find the one which causes this issue and report the defect to the plugin author.

Btw: some logs might be useful here also...

#7 - 2011-03-13 18:08 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Cant reproduce

Closing this as 1.1-stable and trunk are definitely not affected by this issue.
Maybe a plugin that overrides the entire view.

#8 - 2011-03-13 18:28 - Terence Mill

This error is caused by your screenshot paste plugin. As this plugin is weighty for many redmine users, it would be great if you could maintain it together with the redmine release or even integrate it as basic feature.
