Target version:		Affected version:	
Resolution:	Fixed		
<b>Description</b>			
<p>I think the first fuzz about this defect is already posted in the forums (<a href="#">Custom Fields for Issues</a>). The issue is introduced in <a href="#">r4492</a>.</p> <p>After applying that changeset I am no longer able to enable ICF's (which itself <i>are not</i> configured to be "for all projects") for individual projects on the projects settings view.</p> <p>I'll take a look at it later unless it's getting solved before I can... :)</p>
