<b>Target version:</b>		<b>Affected version:</b>	1.0.4
<b>Resolution:</b>			
<b>Description</b>			
<p>Hi,</p> <p>I am using Redmine - 1.0.4 (2010-11-28) with Mysql 5.1 on Windows XP machine.</p> <p>To replicate this issue follow the steps below.</p> <ol style="list-style-type: none"><li>1. Create a sample Project "Template 1"</li><li>2. Add a new Tracker called "Task" via the administration options</li><li>3. For the Project add Issue Categories e.g. Project Meetings</li><li>4. Create a new issue For the Project. For this new issues select the Tracker as "Task" and Category as "Project Meetings".</li><li>5. Now on the Issue Filter Options in Add Filter dropdown select "Category".</li><li>6. For this Category select Category "is" + "Project Meetings"</li><li>7. Apply this filter. Now you will see only issues with Category "Project Meetings"</li><li>8. Save this as query as "Project Meetings". When saving the Query mark it as "Public" and select the Status as "All" and save the query.</li><li>9. In the Administration select "Projects" Copy the above Project to create new project. In the Copy option select Issue categories, Issues, Custom Queries, Members, Wiki pages, Forums.</li><li>10. Select the new created Project. Click on Issues Tab. Now in the Custom Queries when you select "Project Meetings" it does not list the correct issues.</li></ol> <p>Regards, Prasad</p>
