History

#1 - 2011-04-16 16:33 - Etienne Massip

May be somehow related to [RE: "Object is not missing constant Issue!" on CentOS 5.5](#), except it is MySQL instead of pg.

#2 - 2022-01-19 07:50 - Go MAEDA

- Status changed from New to Closed
- Resolution set to Cant reproduce

I am closing this issue because Redmine 1.1.0 is very old.

Please reopen this issue if you experience the same issue when upgrading to the latest version of Redmine.
